INTRODUCTION

This Care & User Manual covers general care, washing, drying, storage and safety advice for fabric/cloth mousepads. Following these guidelines helps prolong the life, performance and appearance of your mousepad.

1. SCOPE & IMPORTANT NOTES

- Always check any product-specific instructions that may come with your mousepad, i.e., LED or glass mousepads.

2. CLEANING & WASHING

1. Fill a sink or basin with lukewarm water (not hot) and add a small amount of mild detergent or gentle hand soap.
2. Submerge the mousepad and gently agitate it in the water for a minute to loosen dirt and oils.
3. Use your fingertips or a soft-bristled brush (very gently) to treat stained areas with circular motions. Avoid aggressive scrubbing in order to not damage the surface of the mousepad.
4. Rinse thoroughly with clean lukewarm water until all soap is removed.
5. Remove excess water by rolling the mousepad into a towel, do NOT wring, twist or aggressively squeeze, as this may damage the top fabric or the rubber base.

Stain removal

- For stubborn stains add a drop of soap directly on the stain and lightly scrub it in the stain with a soft microfiber towel, rinse thoroughly afterwards. Avoid bleach, chlorine, or solvent-based cleaners as they can damage the surface of the mousepad or fade the colors.

3. DRYING & POST-WASH CARE

- Air dry flat on a clean towel in a ventilated area, away from direct sunlight and heat sources (radiators, stoves, hairdryers).
- Allow at least 6-12 hours for full drying depending on thickness and humidity. Ensure the mousepad is completely dry before use to prevent tracking issues and potential mildew.
- Do NOT tumble dry, iron, or apply high heat.

4. STORAGE & HANDLING

- The best way to store the mousepad is to roll it without sharp bends.
- Keep away from prolonged direct sunlight, extreme heat, and damp or humid areas. It is recommended to avoid areas where your cute pets might potentially chew or scratch the mousepad.

5. USAGE GUIDELINES

- Keep the mouseskates of your mouse clean, dirt on the skates transfer can be rubbed into the surface of the mousepad and can drastically reduce performance.
- Do not sit, step on, or use the mousepad as a coaster or placemat. Do not place hot objects on the surface.

6. SAFETY FOR CHILDREN & PETS

- Mousepads are not toys. Small pieces may present choking hazards for children or curious pets.
- Keep the mousepad and its packaging out of children's reach. If your pet chews or swallows part of the pad, seek help immediately.

7. ENVIRONMENTAL & DISPOSAL GUIDELINES

- Fabric mousepads usually contain textiles and rubber. Dispose of them according to local waste regulations, separate materials when local recycling programs require it.

8. WARRANTY & LIABILITY LIMITATIONS

- The manufacturer or seller is not liable for damage caused by improper cleaning (use of bleach, high heat, machine washing, etc.), misuse, unauthorized modification, or negligence.
- This manual provides general guidance and does not replace product-specific instructions or local laws.

CONTACT & SUPPORT

If you have questions about a specific product, contact Mousepadstore.eu customer support at support@mousepadstore.eu with product name and order number.

Thank you for choosing Mousepadstore.eu, follow these care steps to keep your mousepad looking and performing great for years!
